

P506 – Quad CAN Bus Interface PMC

- **32-bit/33-MHz PMC**
- **Full CAN/Extended CAN**
- **4 independent channels**
- **ISO high-speed coupling**
- **Up to 1 Mbit/s data transfer rate**
- **CANopen master and slave support**
- **CAN Layer 2 support**
- **Isolation between channels**
- **Compliant to ISO 11898-1 and ISO 11898-2**
- **-40 to +85°C with qualified components**

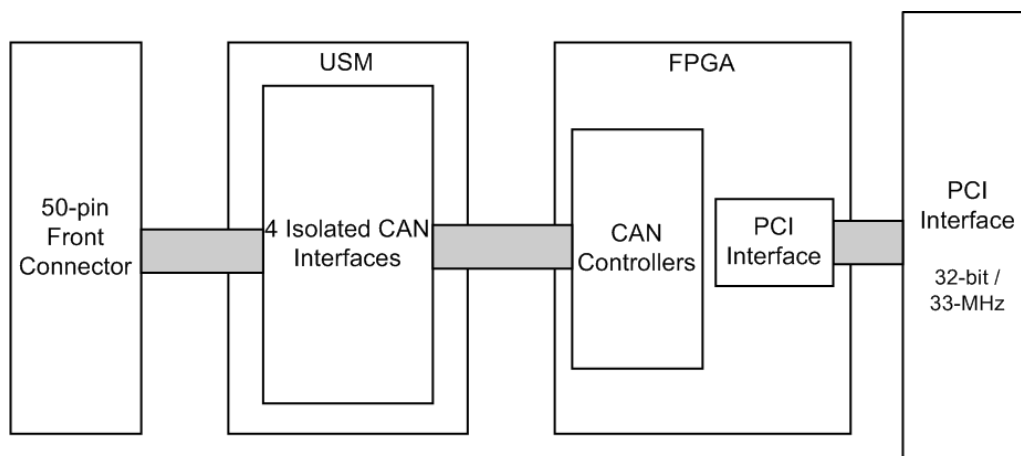

The P506 is a 32-bit/33MHz PMC with four CAN interfaces. They support CAN Protocol Version 2.0A/B, standard and extended data frames, remote frames, 0..8 bytes data length and a programmable data rate of up to 1 Mbit/s. The P506 is based on the USM concept. USM Universal Submodules make PMC modules more flexible than ever. The CAN bus interfaces are realized via four IP cores implemented inside its onboard FPGA. This

function can be changed at any time through implementation of different IP cores. The corresponding line drivers are realized on the USM which is simply plugged on the P506.

The I/O mezzanine module is suitable for any PMC compliant host carrier board in any type of bus system, i.e. CPCI, VME or on any type of stand-alone SBC in telecommunication, industrial, medical, transportation or aerospace applications. It offers long-term availability for at least 10 years and is qualified for operation in the extended temperature range.

Configuration & Options

Standard Configurations

Article No.	Main FPGA Content	Soft Core	Memory	Signals	Cooling Method	Operation Temperature
15P506-00	4 CAN bus interfaces	No	32 MB RAM, 2 MB Flash	Front	Convection	-40..+85°C

Options

CPU	■ Nios® soft core implementation possible (e.g. for real-time Ethernet)
Rear I/O	■ Via Pn4 rear I/O connector
Cooling	■ Conduction Cooling

Please note that some of these options may only be available for large volumes. Please ask our sales staff for more information.
